THE BUCHAREST
INTERNATIONAL
CLINICAL TRIALS
SYMPOSIUM

14 NOVEMBER 2025
Hybrid Event

George Tanaseanu/ACCSCR

- Non-for-profit founded in 2009
- 18 active members
- Supporting the development of clinical trials in Romania
- Generating tangible benefits for:

the patients

the medical community

the industry

Romania as a whole

THE ASSOCIATION OF COMPANIES CONDUCTING
CLINICAL TRIALS IN ROMANIA

Core principles governing the activity of ACCSCR:

- Fostering collaboration among stakeholders, including patients, researchers, industry, and regulatory agencies, to improve the clinical trial ecosystem.
- Prioritizing the interests and well-being of patients and research participants.
- Upholding the highest standards in all aspects of clinical trials.

The challenge and the opportunity

- > **For patients:** better clinical trial access means greater options, potentially earlier access to cutting-edge therapies, and improved outcomes.
- > **For physicians:** clinical trials provide the opportunity to work at the frontier of science, offer their patients new hope, build expertise, and enhance institutional capabilities.
- > **For pharma/biotech:** emerging markets / Romania offer potential advantages – patient populations, investigator networks, cost-effectiveness, and opportunities for innovation partnerships, especially in areas of high unmet need.
- > **For CRO ecosystem** in Romania: enhancing capacity for well-run oncology trials helps position Romania as a competitive location, builds local expertise, strengthens infrastructure and ultimately contributes to better national health outcomes.

Technology and innovation as the lever for advancing medical care and CTs

> Digital / real-world data (RWD) and analytics

> Precision medicine / molecular diagnostics / biomarkers

> AI / machine-learning for trial optimization, imaging, decision-support

> Collaborative platforms & ecosystem partnerships

Invest in **site readiness**: digital infrastructure (EHRs, imaging, trial data platforms)

Incorporate **biomarker and diagnostic capability**

Use **data and analytics** for feasibility, recruitment modelling, retention risk prediction and real-time monitoring

Romania / strong player in research:

- > leverage modern technologies
- > build patient-centric designs
- > enhance data and diagnostics capability
- > foster a robust ecosystem of academic, clinical and industry partnerships.

CTMS

Key Features

- > Study & Protocol Management
- > Participant Tracking
- > Regulatory Document Control
- > eSource
- > CRM

Managerial cockpit

- > Patient Recruitment
- > Financial Management
- > Dashboards & Reports
- > Team Collaboration

Cooperation, the bigger the better...
